

**Awake!**  
Wireless Family Alarm

## WAKE UP TO THE EVOLUTION REVOLUTION.

### Enhanced Go-To-Bed and Get-Up-And-Go Experience

With "Awake," the first networked family alarm system, kids control their own alarms while parents use a separate alarm to make sure all alarms are set correctly. "Awake" features an easy-to-use touch-screen on the parent and child alarms, a photo display, MP3 capability and a two-way intercom system for those morning reminders. With "Awake" children and parents share one alarm and both start the morning off right.
